-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1, 2, 4-6, 10, 14-17, 21, 26 and 28 are rejected under 35 U.S.C. 102(e) as being anticipated by Bond et al.

In regard to claims 1 and 25, the Bond et al. reference discloses a “system” (Fig. 2) for solvent purification, comprising a “holding portion” 14, a “filter” 24, a “computer” (see col. 8, lines 17-34), a “peripheral device” (i.e., laptop computer or touchscreen) and “collection vessel” 12, as claimed.

In regard to claim 4, electronic selection can be received “remotely” via a laptop computer (see col. 8, lines 32-34).

Art Unit: 3751

In regard to claims 2, 10, 26 and 28, the defined commands are capable of being programmed into the system via a laptop or touchscreen.

In regard to claim 5, see unit 1200 in Figure 12.

In regard to claim 6, the filter and solvent holding portion are capable of being detached from the system and located within separate areas.

In regard to claims 14-17 and 21, the method as claimed would be inherent during normal use and operation of the device.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pangborn et al. in view of Bond et al.

In regard to claims 1-28, the Pangborn et al. reference discloses a solvent purification system (see page 1519) substantially as claimed, but does not disclose having an automated system to control the process. However, the Bond et al. reference (discussed supra) discloses another purification system that is automated (see above) in order to carry out the process of purification automatically. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the Pangborn et al. system to have a processor in view of the teachings of the Bond et al. reference in order to automate the purification process.
